

## **Major Trauma TIG update**

The new 12-month Training Interface Group (TIG) for Trauma Surgery, approved by the GMC in July 2017, is now being prepared for incorporation into the five parent curricula. These are: General Surgery, Oral and Maxillofacial Surgery, Plastic Surgery, Trauma and Orthopaedic Surgery and Vascular Surgery; the content of the syllabus is identical within each of them.

The TIG material will be uploaded to the ISCP website and go live in August 2018. For more detail, please see the syllabus [here](#).
